# Bona Traffic HD RAW™

Premium protection that looks and feels like raw wood.

# Bona Traffic HD RAW™

Create ultra-matte, natural looking floors with the superior durability of the Traffic HD family

Bona Traffic HD RAW™ is a two-component, waterborne finish that preserves the look and feel of natural wood. This distinct floor finish allows users to get as close to an untreated look and feel as possible while still maintaining the exceptional Bona Traffic HD® level durability. The extremely low, ultra-matte sheen is consistent from all angles and produces a smooth, soft, natural surface with the feel of raw wood beneath your feet.

Combined with the leading chemical, scratch resistance, and anti-slip properties of the Bona Traffic HD family, as well as a rapid dry and cure time, this finish is the perfect choice for homes with both children and pets and prevents long down times outside of the home. Bona Traffic HD RAW is also the ideal natural wood option for commercial floor surfaces such as office buildings, retail store fronts and more.

## KEY BENEFITS

- Ultra-matte, low sheen that is consistent from every angle
- High durability - unsurpassed scuff, scratch and chemical resistance at full cure
- Natural anti-slip properties
- Fast dry time - approximately 2-3 hours
- Full cure in 3 days
- VOC compliant
- GREENGUARD GOLD certified
