

Product Data Sheet

Pump Touch-Up Marker (6ml wood/furnishing repair marker)

767XXX

Overview: Dover Finishing Products Pump Touch-Up Markers are designed to hide scratches and other surface imperfections as well as to restore colour to worn areas on a wide variety of wood and finished surfaces. The pump delivery system is optimized for more open grain wood and porous surfaces. The pump system allows for more or less flow depending on the requirements of the touch-up. As well, the ability to increase the flow of the marker allows for shallow fills.

- Easy repair of scratched and worn areas
- Flow control allowing for fill of shallow scratches
- Can obtain greater opacity than the Factory marker
- No need to topcoat, but compatible with most finishes

Key properties

Transparent, transparent to semi-translucent wood tones and transparent to semi-translucent grey tones

Semi-gloss sheen

Average dry time: 5-7 minutes

Average time to recoat: 30 minutes

Shelf life: 2+ years

Directions

Shake well before using. If mixing ball bearing is lodged in the solid, tap the base of the marker lightly on a hard surface to loosen it. Depress the tip to start the flow until the tip is saturated to the job requirement. Apply in the direction of the scratch and use a cloth or your thumb to wipe excess outside of the repair area. For worn areas, apply the markers along wear, wiping excess as quickly as possible before drying. Top coat if necessary once dry.
