

## Full declaration of ingredients **Anti-Slip Decking Oil**

### **Binding agents:**

- Based on the renewable plant raw materials: sunflower oil, soya oil, thistle oil and linseed oil

### **Solvents:**

- Aliphatic hydrocarbons = dearomatized white spirit (benzene-free)

### **Additives:**

- Siccatives (are obtained from the respective minerals and are lead-free)
- Ketoximes
- Polysiloxanes (on basis of silicic acid)
- UV-absorber
- Polypropylene-co-polymer

The listed ingredients serve to regulate the drying process and to prevent film formation (5 years storage stability) and as a strong water repellent anti-slip effect. The UV-absorber increases the weathering and aging resistance.

### **Active agents (film protection):**

- Propiconazole

Osmo Anti-Slip Decking Oil contains active agents to protect the coating against algae and fungus attack.

Further information, e.g. for the technical characteristics, please refer to the product information.
