

## Add some color to your epoxies.

EcoPoxy **Color Pigments** are specially formulated to provide a rich and vibrant pigmentation solution for EcoPoxy products.

It's great for art and architectural work. The advanced tint properties of these highly concentrated pigments allow you to do more with less when compared to other pigments.

*They are used to tint epoxy resins used as coatings, paints, gelcoats, laminating, casting or self-leveling resins.*
