

INSTABLACK INSTANOIR

USER GUIDE

1 Preparing the solution

- Pour the correct quantity of water (1 L or 3.78 L) in a container of your choice.
- Mix well the three sachets with the water.

2 Applying the solution

- Prep the surface to be treated.
- Apply a coat of the solution to the prepared surface.
- Allow to dry for at least 30 minutes or until the surface is dry to the touch.
- Apply a second coat. (If necessary, add additional coats).

BEFORE YOU START

The surface to be treated should be free of paint, varnish, dye or any other product. We recommend working on a lightly sanded, smooth, dry and dust-free surface. INSTABLACK is designed and recommended for indoor projects. However, it can also be used for outdoor projects. Please note that, when used outdoors, the product's appearance will gradually change with exposure to UV rays, becoming noticeably lighter over time. The best results will be obtained at an application temperature between 12 °C and 30 °C. INSTABLACK is compatible with all types of varnish, sealer and epoxy.

NUMBER OF COATS

Each coat INSTABLACK enhances the black colour of your surface. We recommend a minimum of two coats. If you find the shade too dark, we recommend lightly sanding the surface.

TOOLS FOR APPLYING INSTABLACK

All you need is your INSTABLACK kit, a big-enough container and a tool for applying the product (bristle or foam brush, long-nap roller, sprayer or sponge).

SHELF LIFE AND DISPOSAL

In its dry form, INSTABLACK can be stored indefinitely. Once mixed, the solution is optimal for 48 hours. After use, dispose of the solution by pouring down the drain; it poses no threat to plumbing or septic systems.

WARRANTY

Please note that results may vary according to type of wood used. The user assumes full responsibility for the results following product application according to these instructions. The manufacturer's liability is limited to product replacement.

FIRST AID

The product may irritate skin. Wear gloves to avoid direct contact with hands. In case of contact with eyes, rinse with plenty of water. If accidentally swallowed, do not induce vomiting. Call poison control and seek medical advice. Keep out of reach of children and animals.
