

LIQUID WAX CLEANER

Combines cleaning and refreshment!

3029
Clear

3087 White
Transparent

DESCRIPTION

For the occasional refreshment of floorings treated with Polyx Oil, furniture, as well as other oiled wooden surfaces in the interior.

When maintained properly, the surface is treated with natural, non-hazardous hard waxes (caranauba-wax and candelilla-wax). The flooring remains hard-wearing, without forming a film.

RECOMMENDED USE

Osmo Liquid Wax Cleaner/Spray can be used on all surfaces that are resistant against disaromatised white spirit. E.g. wood, cork, linoleum, PVC, plastic coatings, stone, marble and ceramic tiles.

INGREDIENTS

Based on natural vegetable waxes (carnauba wax and candelilla wax); paraffin wax, aliphatic hydrocarbon (>30 %).

TECHNICAL DATA

Specific gravity: 0.77-0.8 g/cm³

Viscosity: >30s DIN EN ISO 2431/3 mm, viscid

Odour: Faint/mild, odourless after drying

Flashpoint: >27 °C according to DIN EN ISO 2719

STORAGE

Shelf life is 5 years or more if can is tightly closed. Store in a dry place. If thickened by frost it will regain a normal consistency under normal temperatures within 24-36 hours.

SURFACE PREPARATION

Wood surface must be dust-free and dry. For this purpose generally a duster, a mop or a vacuum cleaner is suitable. For a simple cleaning and maintenance the Osmo Opti-Set (Dust Mop, Micro-Mop Plus and an Active Fibre Cloth) is highly recommended. For the

cleaning of frequently high-traffic and dirty flooring, e.g. in public areas, use the Osmo Micro-Mop (as cleaning fluid water mixed with Osmo Wash & Care) and wipe dry afterwards.

METHODS OF APPLICATION

Manual use: For stain removal and for intensive maintenance please, use the Osmo Liquid Wax Cleaner with our Active Fibre Cloth (approx. 2 tea spoons per m²).

Wipe off especially persistent stains with Osmo Liquid Wax Cleaner with a piece of cloth or a scotchpad.

Mechanically use: Spread the Osmo Liquid Wax Cleaner with a single disc machine and a white pad all over the surface (approx. 2 tea spoons per m²). Massage evenly.

In case of formation of streaks, either turn the pad over or use a new pad, see also description from the FloorXCenter.

For a more intensive gloss level, spread well over the surface and polish up. (Preparation of cleaning please also see Product Information from Osmo Wash and Care).

Note: Apply very thinly; otherwise footprints may appear.

Please use Osmo Liquid Wax Cleaner White only for white coloured surfaces.

CLEANING OF TOOLS

With Osmo Brush Cleaner (free from aromatic compounds).

DRYING TIME

Approx. 30-40 minutes

COVERAGE

Coverage of Osmo Liquid Wax Cleaner / Spray is extremely dependent on the absorbency and the dirt degree on the ground. (1 Litre for approx. 80-100 m², 2 tea spoons for approx. 1 m²).

NOTE

When applying hard waxes (carnauba wax and candleilla wax), flooring gets refreshed and the resistance to stains and abrasion becomes much better. At regular interval it is absolutely necessary to give the required oil-content of the Polyx Oil back to the flooring within the years.

On especially heavily worn areas (walkways etc.), re-apply the Osmo Polyx Oil after careful cleaning of the surface.

Note: While the pores of the wood are sufficiently saturated with the first treatment, we recommend a single thin re-oiling of the flooring.

CAUTION

Flammable. Repeated exposure may cause skin dryness or cracking. Vapours may cause drowsiness and dizziness. Keep out of the reach of children. Keep away from sources of ignition – No smoking. Avoid contact with skin and eyes. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. If swallowed, seek medical advice immediately and show this container or label. Use only in well-ventilated areas.

Safety data sheet for professional users on request.

DISPOSAL

Dispose of product residuals and completely emptied containers according to the local official guidelines (EU-waste code key number 08 01 11). Only fully emptied containers can be recycled.

COLOUR TONE
